EDUCATION

Tufts University

Bachelor of Science in Computer Science

Medford, MA

Sep. 2021 – May 2025

TECHNICAL SKILLS

Languages: TypeScript, Python, Rust, Java, C/C++, SQL, JavaScript, HTML/CSS, Bash

Frameworks: React, Node.js, Next.js, Axum, Chrome Extensions (Manifest V3), Unity, GSAP

Cloud & Tools: Firebase, Firestore, Supabase, Postgres, Google Cloud Platform, Git, GitHub Actions, Docker

AI/ML: Claude Agent SDK, LangChain, RAG Pipelines, MCTS, Evaluation & Telemetry, Prompt Engineering

EXPERIENCE

Stax Labs, Software Engineer

Jul 2026 – Present

Remote

- Architected and shipped Buddi's company-exposure system end to end across a 5-table Postgres and pgvector data model, a JWT-protected LLM proxy, and a TypeScript and Supabase agent tool
- Reduced unsupported company-exposure claims from 14% to 2% across 300 production turns while maintaining a 71% supported-answer rate through dated source receipts and explicit abstention

Matrices.ai, Software Developer / Project Lead

Jun 2025 – Jun 2026

Remote

- Diagnosed and resolved 56 on-call production bugs in a TypeScript/Next.js service reimplementing the Google Calendar API, fixing recurring event propagation, cross-calendar attendee sync, and state leakage
- Built an automated testing pipeline with parallel process orchestration that executed 137+ API test cases, surfacing 81 bugs across Google Calendar, Gmail, and HubSpot API implementations
- Promoted to project lead three months in, owning the Calendar API clone and the agent task environments
- Built 89 API route handlers across a 201-file HubSpot environment used to evaluate computer-use agents

Engineering Education Research, Software Developer

Sep 2023 – Aug 2025

Medford, MA

- Built the full stack for a Unity (C#) 3D water purification simulator used by 200+ environmental engineering students, including the interactive 3D experience and assessment modules with learning analytics

GoDaddy, Software Developer Intern

May 2024 – Aug 2024

Remote

- Built data pipelines and OAuth flows for 5 social integrations (TikTok, Yelp, Instagram, Google, WhatsApp)
- Developed full-stack API connectors and UI components for media retrieval, adopted by internal teams

PROJECTS

PageAura | pageaura.app | TypeScript, React, Vite, Supabase

Feb – Aug 2026

- Shipped an EPUB reader end to end solo with AI mood analysis and an audio worker, live at pageaura.app
- Built read-aloud narration for an EPUB reader, keeping the audio in sync with the text within 0.12s (median)
- Designed a pass/fail alignment gate cataloguing 1,561 timing problem zones across 6 books at 98.9% coverage

Pokemon Showdown Copilot | github.com/Ed-Key/showdown-stack | TypeScript, React, Rust

Apr – Jul 2026

- Built a real-time copilot for live Pokemon Showdown battles pairing a Rust MCTS search engine with an LLM planner grounded in computed game facts, shipped with CI and a recorded public demo
- Built a FastAPI service wrapping an open-source 142M-parameter PyTorch model, measured at 19ms p95 per call
- Added a mechanics verifier validating model claims against a local Pokedex, dropping bad claims not whole plans

Kemuma Studio | github.com/Ed-Key/kemuma-studio | TypeScript, Next.js, React, SQLite

Jul 2026 – Present

- Built an agent pipeline turning a phone photo into a priced Etsy listing, running daily with 19 listings live

Daily Bread | daily-bread-landing.web.app | TypeScript, React, Firebase, Webpack

Feb 2026 – Present

- Shipped AI reflection questions and scheduled verse reminders for a Chrome extension with 38+ active installs
